

# **4E66 Containers to Lander St**

**A scenario for the Birmingham 2010 route**

Copyright

You are not permitted to redistribute this pack.

**Please do not upload on any other websites.**

A 50 minutes scenario for the Birmingham 2010 route by John Griffiths available from:

<http://www.trainsim.com/vbts/content.php>

Click on File Library-Search Files. Then, in the "Search for Text" box just type: John Griffiths.

There is no additional DLC for this scenario as if you have downloaded the DLC to run the route fully you will have the DLC for this scenario.

This scenario is purely fictitious and in no way meant to represent any actual timetable, services or prototypical operations. It was written for my own enjoyment and learning and I hope you enjoy it as well.

## **4E66 Containers to Lander st**

You have just been given a clear line after being held just before Stoke Junction. Complete the run up to the container sidings at Lander St. Not as straight forward as it seems as you will be following a stopping passenger train from the top of the Lickey Incline. Pay attention to the signals and the pop up boxes that are provided to aid your progress. Good luck and enjoy the run.
